BIO

B.Sc. student in Industrial and Information Systems Engineering with experience in data analysis, KPI development, and statistical modeling.

Skilled in analyzing datasets, identifying patterns, and supporting data-driven decision making, with hands-on experience in SQL, Python (Pandas, NumPy), Excel, and working with large scale datasets (Big Data).

Available for a half-time position.

Education

B.Sc. in Industrial and Information Systems Engineering

Bar-Ilan University

2023 - Current

Language

- English Fluent
- Hebrew Native

Projects

Sports Analytics – Bnei Herzliya Youth Sports Organization

2nd Place – Sharks Innovation Competition

- Analyzed participation, budget, performance, and dropout datasets from a youth sports organization.
- Developed KPIs to evaluate department efficiency and athlete retention.
- Applied regression analysis and data visualization to identify key performance drivers.
- Produced data driven recommendations for improving retention and optimizing resource allocation.

Cognitive Performance Study – Music and Attention

- Developed a web-based memory game using HTML, CSS, and JavaScript and collected behavioral data under different music conditions.
- Defined performance KPIs including accuracy and reaction time, and stored experiment results in structured datasets.
- Conducted statistical analysis using Python (Pandas, NumPy) and Excel to evaluate the relationship between background music and cognitive performance.

Analysis of Performance Factors Influencing Badminton Match Outcomes

- Analyzed badminton tournament datasets to identify key factors influencing match outcomes.
- Applied logistic and linear regression models to examine relationships between performance metrics and winning probability.
- Developed data driven performance indicators (KPIs) to support coaching strategy, training focus, and match preparation.

Work Experience

Bar-Ilan University I QA Tester – Computer Game (Unity) 2026

- Conducted QA testing for a computer game, identifying bugs and unexpected behavior.
- Tested gameplay mechanics and system stability.
- Documented issues and collaborated with developers to improve product quality.

Redis I Help Desk & System Administrator 2022 – 2023

- Provided technical support, troubleshooting, and system setup.
- Managed user accounts, permissions, and system access.
- Installed and configured networking components (switches, firewalls, VPNs).
- Technologies: SQL, Python.

Keshet I Logistic Manager & Social guide for American Youth 2022

- Coordinated logistics and schedules with multiple organizations.
- Managed and guided groups of 50+ international students in English
